	R 0		
eses davised against iterie interni	PPE		
	Sec.8.		
Freeman Manufacturing & Supply Company			
1101 Moore Road, Avon, OH 44011 Telephone (440) 934-1902			
24 Hour emergency telephone number: CHEMTREC (800) 424-9300			
Section 2 Hazards Identification			
GHS Classification			
This product is not a hazardous as defined in 29 CFR 1910.1200 (OSHA HCS)			
GHS Label elements, including precautionary statements			
Not a hazardous substance or mixture.			
Hazards not otherwise classified (HNOC) or not covered by GHS None known			
None known			
Section 3 Composition/Information on Ingredients			
Mixture			
Proprietary mixture of non-sulfur fillers, waxes, resins, polymers, and pigments			
Quartz and titanium dioxide are naturally occurring components of an ingredient used	in this		
Quartz and titanium dioxide are naturally occurring components of an ingredient used in this preparation. In this product the quartz and titanium dioxide are not airborne, unbound particles			
of respirable size and do not present a health hazard.	purvieree		
Section 4 First-Aid Measures			
Description of first aid measures			
If inhaled			
Not anticipated to be an inhalation risk. Avoid exposure to fumes if the product is			
overheated/molten. Move to fresh air. Get medical advice/attention if you feel unwell.			
In case of skin contact			
Modeling clay is normally used with no skin protection. If irritation appears, it may be a	in allergic		
reaction. Discontinue use and seek medical attention if symptoms persist.			
In case of eye contact			
Immediately flush eyes thoroughly with water for at least 15 minutes. If irritation persists, get medical assistance			
If swallowed			
Do not induce vomiting. Get medical advice/attention.			
Most important symptoms and effects, both acute and delayed			
Contact with molten product may cause severe burns to skin and eyes. Burns should be			
as thermal burns. The material will come off as healing occurs; therefore, immediate ren	moval		
from skin is not necessary			
Indication of any immediate medical attention and special treatment needed			
Treat symptomatically.			

2-AB210 Freeman Classic Clay

Section 5 Fire-Fighting Measures

Suitable extinguishing media

Use water fog, alcohol-resistant foam, dry chemical or carbon dioxide.

Unsuitable extinguishing media

Do not use water jet as an extinguisher, as it may spread the fire.

Special hazards arising from the mixture

Watch footing on floors and stairs because of possible spreading of molten material. Material can create slippery conditions. In case of fire hazardous decomposition products may be produced such as: Carbon dioxide, carbon monoxide and complex hydrocarbons.

Special protective equipment and precautions for firefighters

Wear self-contained breathing apparatus for firefighting if necessary.

Do not breathe fumes. Move containers away from fire area if safe to do so.

Section 6 Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

Avoid breathing vapors. Eliminate all sources of ignition. For personal protection see section 8.

Methods and materials for containment and cleaning up

Sweep up the spilled material. If it is clean, place in a suitable container for use. If it is contaminated, collect in a suitable container for disposal. Note that pelletized product can travel some distance when spilled. Prevent the spillage entering drainage channels.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

Section 7 Handling and Storage

Precautions for safe handling

Use only in a well ventilated area and avoid breathing fumes. Avoid eye contact. Avoid skin and eye contact with molten material. Do not eat, drink or smoke while using this product.

Conditions for safe storage, including any incompatibilities

Keep product closed in its original packaging until used. Keep dry; avoid temperature extremes (keep between 5 & 30° C / $41 \& 86^{\circ}$ F) and direct sunlight. Keep away from sources of ignition, oxidizing agents and other chemicals.

Specific end use(s)

Avoid heating above 100°C (212°F).

Section 8 Exposure Controls/Personal Protection

Occupational exposure limits

Substance	Long term exposure limit (8 hr. TWA reference period)	Reference
Paraffin Wax Fume CAS # 8002-74-2	2 mg/m ³	USA - NIOSH

Appropriate engineering controls

Good general ventilation should be used. If applicable, use local exhaust ventilation or other engineering controls to maintain airborne levels of fume or vapor (molten product) below recommended exposure limits.

Section 8 Exposure Controls/Personal Protection continued

Section 8 Exposure Controls/Personal Protection continued					
Personal protective equipment					
Eye/face protection					
1 1	With product at ambient temperatures, use safety glasses.				
Hand Protection					
Wash hands after use					
Respiratory Protection					
The need for respiratory protection is no	t anticipated under normal use conditions and with				
	adequate ventilation. If elevated airborne concentrations are anticipated, a NIOSH-approved				
respirator with organic vapor cartridge and full face piece should be used. General Hygienic Practices					
Wash thoroughly after handling, and before eating, drinking or smoking.					
Appearance	Waxy brown solid				
Odor	Characteristic				
Odor Threshold	No data available				
pH	No data available				
Freezing point	No data available				
Initial boiling point & boiling range	No data available				
Flash point	No data available				
-	No data available				
Evaporation rate					
Flammability (solid, gas)	No data available				
Upper/lower flammability	No data available				
Vapor Pressure	No data available				
Vapor density	No data available				
Relative density	No data available				
Water Solubility	Soluble				
Coefficient: n-octanol/ water	No data available				
Auto-ignition temperature	No data available				
Viscosity	Solid at room temperature				
Section 10 Stability and Reactivity					
Reactivity	None known				
Stability	Stable as supplied				
Possibility of hazardous reactions	None known				
Conditions to avoid	Avoid molten state. Excessive thermal exposure will				
	oxidize the product. Generation of gas during				
	decomposition can cause pressure in closed systems.				
	Avoid static discharge.				
Incompatible materials	Strong acids, strong bases, strong oxidizing agents.				
Hazardous decomposition products	Decomposition products depend on air supply and				
	the presence of other materials. They can include and				
	are not limited to: carbon dioxide, carbon monoxide,				
	alcohols, ethers, aldehydes and carboxylic acids.				

Section 11	Section 11 Toxicological Information			
Information on likely routes Inhalation Skin contact Eye contact Ingestion	None known No adverse effects due to skin contact are expected. Molten product will cause thermal burns on contact with the skin. Molten product will cause thermal burns on contact with the eyes. Solid product may produce irritation upon contact with the eye. No data available			
Skin corrosion/irritation Serious eye damage/irritation Respiratory or skin sensitisation Germ cell mutagenicity Carcinogenicity	No data available on product. No data available on product. No data available on product. No data available on product. No data available on product. Long term exposure to crystalline silica can cause lung injury (silicosis). IARC and NTP have determined that crystalline silica inhaled from occupational sources can cause cancer in humans. Risk of injury is dependent on the duration and level of exposure. This product does not contain respirable crystalline silica.			
Toxicity for reproduction STOT – repeated exposure Aspiration hazard Section 12	No data available on product. No data available on product. No data available on product.			
Section 12 Ecological Information Toxicity No data available Persistence and degradability No data available Bioaccumulative potential No data available Mobility in soil No data available Results of PBT & vPvB assessment No data available Users of the product should ensure that it is stored, handled and disposed of in such a manner that it is not released to the environment. Spent material from the flash fire furnace or autoclave must therefore be stored in such a manner as to prevent environmental contamination, either by solid product or rain water run-off from it.				
Section 13 Disposal Considerations				
Contact a licensed contractor for detailed recommendations. Dispose of in accordance with all applicable Federal, state, and local regulations.				
Section 14	Transport Information			
DOTNot RegulatedIMDGNot RegulatedIATANot Regulated				

2-AB210 Freeman Classic Clay

Section 15 Regulatory Information

US Federal Regulations

TSCA: All components of this product are listed or exempted from listing on the United States Environmental Protection Agency Toxic Substances Control Act (TSCA) inventory. EPCRA section 302: This material contains no extremely hazardous substances SARA 311/312: None SARA 313: Not applicable

US State Regulations

California Proposition 65: None

This product contains silica, crystalline and titanium dioxide which are neither airborne, nor unbound particles of respirable size.

Section 16 Other Information

Disclaimer

The following supersedes Buyer's documents. SELLER MAKES NO REPRESENTATION OR WARRANTY, EXPRESSED OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. No statements herein are to be construed as inducements to infringe any relevant patent. Under no circumstances shall Seller be liable for incidental, consequential or indirect damages for alleged negligence, breach of warranty, strict of liability arising in connection with the product(s). Buyer's sole remedy and Seller's sole liability for any claims shall be Buyer's purchase price. Data and results are based on controlled lab work and must be confirmed by Buyer by testing for its intended conditions of use. The product(s) has not been tested for, and is therefore not recommended for, uses for which prolonged contact with mucous membranes, abraded skin, or blood is intended; or for uses for which implantation within the human body is intended.
